PROJECTS

Chef It Up | Personal Project

April 2023 - Present

- Chef It Up is a website and app I created to showcase my favorite recipes and pay homage to my mother's culinary dishes.
- The website's structure was built using **HTML** and **CSS** in the **React** framework, providing a user-friendly interface for visitors.
- The app is designed in **Flutter** with a backend implementation of **Firebase**.

Artist Search | Personal Project

June 2023

- A personal music artist lookup tool that provides their top songs in their discography and a grid of their top albums.
- Implemented the **PyGame** library and **Spotify Developer API** to provide a functional and aesthetic interface.

Music Me | Personal Project

Present

- My personal IOS music player app, elegantly playing and showcasing local songs through a meticulously designed **Flutter** UI.
- Successfully integrated IOS mobile simulation using **Xcode**, enhancing the functionality of the Music Me app.

PROFESSIONAL EXPERIENCE

Intern to Technical Strategist | Microsoft

Spring 2021

- Interned with a Director Partner Technical Strategist to understand the use of artificial intelligence in the healthcare industry.
- Worked on a project involving the use of image and object detection to learn how artificial intelligence is useful in everyday life.
- Became knowledgeable with **Microsoft Azure** and **Python** while working on small projects involving facial recognition and object detection.

WORK EXPERIENCE

Sales Advisor | Best Buy

March 2023 - September 2023

- Exceeded sales targets at Best Buy through exceptional customer service, providing personalized solutions, and achieving high customer ratings.
- Led store satisfaction surveys, addressed customer needs, and collaborated on optimizing operations for a cohesive and successful work environment.
